Plan your articles and links

Worked example: an imaginary business, not a client result. Use the next pages for your own plan.

Pillar: a blog category aligned with a primary service or product collection. The category groups its articles; the service page presents the actual offer. There is no required page count or word count.

Complete fields in a PDF reader that supports forms, or print. Save your own copy. Read the full article at zincdigital.co/blog/build-a-content-hub-people-can-use/.

Choose the subject and purpose

Decide who the article is for and what it should help them understand or do.

Offer and business goal

Reader and decision they need to make

Pillar category / aligned service or collection

Included blog subjects

Excluded subjects and why

Where the reader can enquire or buy

Map the questions to pages

One task per row. Similar wording does not automatically require separate pages.

1. Customer question

Preferred page / existing URL

Answer / facts and sources to check

Reader next step / person responsible

2. Customer question

Preferred page / existing URL

Answer / facts and sources to check

Reader next step / person responsible

3. Customer question

Preferred page / existing URL

Answer / facts and sources to check

Reader next step / person responsible

4. Customer question

Preferred page / existing URL

Answer / facts and sources to check

Reader next step / person responsible

Copy this sheet for more questions. The category groups the articles; each article answers a distinct question. Check for repetition before writing another article.

Audit the pages and plan the links

Keep, update, combine or create. A combination needs a destination and a redirect check.

1. Existing page / purpose

Action / preferred destination

Link from to / wording / reason

Owner / redirect or link test / due date

2. Existing page / purpose

Action / preferred destination

Link from to / wording / reason

Owner / redirect or link test / due date

3. Existing page / purpose

Action / preferred destination

Link from to / wording / reason

Owner / redirect or link test / due date

Check the pages before launch

Choose one status per check: P = Pass, F = Fix, N = Not applicable. Keep evidence on page 6.

P F N

- ☐ ☐ ☐ 1. Reader, business goal, pillar category, aligned service or collection, and excluded subjects are recorded.
- ☐ ☐ ☐ 2. Every article, category and service page has a clear purpose, an address and a useful next step.
- ☐ ☐ ☐ 3. Similar questions have been reviewed together; unnecessary duplicates are resolved.
- ☐ ☐ ☐ 4. Existing articles have been checked before new ones are planned.
- ☐ ☐ ☐ 5. The category hub introduces the topic and lists the relevant articles; each guide answers its own question in substance.
- ☐ ☐ ☐ 6. Blogs within the category add distinct answers rather than repeating one another.
- ☐ ☐ ☐ 7. Service details, prices, exclusions and procedures match the current offer.
- ☐ ☐ ☐ 8. Claims have suitable sources or a factual reviewer; examples are labelled.
- ☐ ☐ ☐ 9. Each page has a useful title, headings, descriptive search summary and accurate author or reviewer identity.
- ☐ ☐ ☐ 10. The category hub links to the articles it houses, which display a route back to the category.
- ☐ ☐ ☐ 11. Contextual links connect related answers where helpful, without compulsory links to everything.
- ☐ ☐ ☐ 12. Relevant navigation or content reaches the category hub; no required page is isolated.

P F N

- ☐ ☐ ☐ 13. Links reach correct live destinations; redirects and replacement links are verified.
- ☐ ☐ ☐ 14. The website team has checked successful responses, indexing access and preferred addresses; intended public pages have no accidental draft blocking.
- ☐ ☐ ☐ 15. The sitemap includes the intended public pages; structured data, if used, matches visible content. Neither guarantees indexing or ranking.
- ☐ ☐ ☐ 16. Someone who did not write the guide can find the answer and complete the intended task.
- ☐ ☐ ☐ 17. Mobile headings, diagrams, tables and links are usable; keyboard users can reach actions.
- ☐ ☐ ☐ 18. Images have useful alternatives; important information is also explained in the text.
- ☐ ☐ ☐ 19. Downloads open, contain the promised pages and have descriptive names; workbook fields can be used or printed.
- ☐ ☐ ☐ 20. The form, checkout or booking route works, including confirmation and delivery to the right person.
- ☐ ☐ ☐ 21. Named people check the facts, publish the pages and keep them current.
- ☐ ☐ ☐ 22. The team has recorded the collection's pages and measures it can reliably use.
- ☐ ☐ ☐ 23. Existing performance is recorded with dates and known limitations.
- ☐ ☐ ☐ 24. A review date and triggers are assigned: changed services, questions, links or instructions.

Record checks and review results

An unchecked item is unresolved. A download or enquiry increase alone does not prove impact.

Unresolved checks: number / evidence / owner / due date

Not applicable: check number and reason

Page group / measures / source / baseline dates and values

Comparable review dates / findings / changes / limitations

Factual reviewer / launch approval / next review and triggers
